To: The Members of the Board

RE: ACCCT Survey  
Future of Data Reporting

The attached memo and survey link from ACCCT Partners is being provided to the Board's membership to solicit information concerning the future direction of electronic data reporting.

We appreciate your response to this inquiry and look forward to working with the other Boards and Bureaus in addressing the future needs of the industry.

Very truly yours,

Monte Almer

President

**TO:** Member Carriers  
**FROM:** ACCCT  
**RE:** ACCCT the Future Survey  
**DATE:** August 1, 2011

ACCCT is a collaborative effort for the development and implementation of data reporting solutions. Some of the products/services that have previously been developed by ACCCT and with which you may be familiar with include:

- Bureau Entry & Edit Package (BEEP)
- Policy Entry & Edit Package (PEEP)
- Compensation Data Exchange (CDX)

Over the past number of months, the ACCCT Partners have been discussing where the future of data reporting may be heading. To further aid our discussions, we are soliciting carriers' input with respect to their expectations about future electronic data reporting.

To help us get started in accomplishing this objective, ACCCT has developed an initial survey to gather this type of information. You can access this survey by clicking on the following link:

<https://www.surveymonkey.com/s/MBGTX36>

If you have any questions concerning the survey, please contact Art Cadorine, ACCCT Facilitator at [acadorine@si.rr.com](mailto:acadorine@si.rr.com).

ACCCT is a cooperative and innovative vehicle for developing and deploying tools and applications in response to changing opportunities and the evolving electronic data reporting needs. Please take a few minutes to complete this survey, which will allow us to consider your perspective as we work to address our mutual interests.
